

REMARKS

Following the suggestion by the Examiner, applicant has amended claims 6, 9, 10, 21-25 and 32.

Claim 6 has been amended to change "a shift amount in time indicative of a clock shift between the server and the client" to "a shift amount in time indicative of a difference between a sampling rate and a transmission rate of a packet at the server"

The support of the amendment can be found in claim 1.

Claims 9 and 10 have been amended to change the claim dependency.

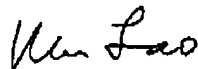

Claims 21-25 have been amended to specify the computer readable medium being "a non-transitory computer readable storage medium" as suggested by the Examiner.

Claim 32 has been amended to change "a shift amount in time indicative of a clock shift between the network element and the client" to "a shift amount in time indicative of a difference between a sampling rate and a transmission rate of a packet at the network element", and to add a hardware element of "server buffer".

The support of the amendment can be found in claim 1 and Figure 19; page 19, lines 3-4 of the specification.

No new matter has been introduced.

Respectfully submitted,

Kenneth Q. Lao
